

# Does TimeWise™ cover only 95% of your needs?

**A**RE YOU LOOKING FOR A PERFECT FIT in an off-the-shelf world? You may have found, as many others have, that TimeWise™ is perfect for your organization just the way it is.

However, if you have found that TimeWise™ covers only 95% of your needs, consider the TimeWise™ Shared Development Program before you start going to all the trouble of designing a custom system from scratch. Here's how it works...

David Berman Developments creates custom programming for organizations like yours. If

**TimeWise™ +** the features you need are features we'd

like to see in an upcoming version of TimeWise™, we'll offer to program them, and only ask that you cover our costs.

#### YOU'LL BENEFIT BY:

- getting just what you need at a great price
- not reinventing the wheel
- saving a lot of money
- avoiding months of testing
- having software tested by a beta program
- having complete documentation
- staying on an inexpensive upgrade path
- having your programming performed by a firm that must answer to the quality standards of its entire user base

#### HERE'S HOW

Determine the additional features you would like to see in TimeWise™. Then jot them down and fax or e-mail them to us.

An experienced software designer will contact you to discuss your needs in more detail, and then forward a detailed proposal along with a guaranteed firm price.

Once we receive your go-ahead, the new features are programmed according to your specification. After extensive internal testing, you receive a version for your approval. Any requested adjustments are made promptly. You can then proceed to use the new features immediately.

When future versions of TimeWise™ are released, your features may be included.

#### EXPERIENCE

Participants in the Shared Development Program include Occidental Petroleum, the Canadian Armed Forces, and our federal departments of Agriculture and Revenue. *References are available upon request.*
