

Use TimeSave™ to connect everyone to TimeWise™.

TimeSave™ for Windows now available.

To get the full benefits of TimeWise™ in your enterprise, you need to give everyone the power to post and view information that helps get the job done on time and on budget.

For many people in your organization a full license to the TimeWise™ multiuser edition is just the ticket, including its thorough analysis and reporting tools.

However, others may be better served with simplified, limited access to tools that let them tell you what's going on as it occurs and let them access up-to-the-minute information about every job.

That's where TimeSave™ comes in. TimeSave™ is a simplified, scaled down version of TimeWise™, intended for those members of your team who don't need access to the full suite of management tools in TimeWise™...and at a fraction of the price.

TimeSave™ cannot be used without TimeWise™. Rather you add it to an existing TimeWise™ multiuser installation. Each user can choose between TimeSave™ for Windows or TimeSave™ for DOS.

TimeSave™ users interact in real time with TimeWise™ users, sharing the same data on their choice of platforms.

A thorough security profile for each TimeSave™ user lets you to control what each person can and cannot do or see. Best of all, TimeSave™ costs only \$195 a user (even better for a site license).

For more information on TimeSave™, contact your Authorized TimeWise™ Reseller. Or contact David Berman Developments directly at 800-665-1809, fax (613) 235-7067 or email 71610.1501@compuserve.com.

**DOS OR WINDOWS
ONLY \$195.**
